ABSOLUTE PERFORMANCE ■

Objective and Investment Policy

To achieve a positive return in any type of market condition (absolute return strategy). The Sub-Fund invests in exchange-traded options on the Euro Stoxx 50 index that have a one-year average maturity. Any assets that remain uninvested after the Sub-Fund has reached its target volatility exposure are invested in money market instruments. The Sub-Fund may invest up to 100% of net assets in these liquid investments.
The Sub-Fund makes extensive use of derivatives to reduce various risks, for efficient portfolio management and as a way to gain exposure (long or short) to various assets, markets or other investment opportunities (including derivatives which focus on equities, interest rates, foreign exchange and dividend). **Benchmark :** The Sub-Fund is actively managed and seeks to outperform the Euro Short Term Rate Index (ESTER) + 3% per annum, over the recommended holding period, while offering controlled risk exposure. The Sub-Fund may use a benchmark a posteriori as an indicator for assessing the Sub-Fund's performance and, as regards the performance fee benchmark used by relevant share classes, for calculating the performance fees. There are no constraints relative to any such Benchmark restraining portfolio construction. **Management Process :** The Sub-Fund integrates Sustainability Factors in its investment process as outlined in more detail in section "Sustainable Investment" of the Prospectus. The investment team analyses market volatility patterns to determine the direction and extent of its volatility exposure: positive exposure when volatility is low and anticipated to rise, negative exposure when volatility is high and anticipated to decline. It also seeks to benefit from short term fluctuations of volatility ("volatility of the volatility").

Lower Risk — Higher Risk

⚠ The SRI represents the risk and return profile as presented in the Key Information Document (KID). The lowest category does not imply that there is no risk. The SRI is not guaranteed and may change over time. The risk indicator assumes you keep the product for 3 years.
The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movement in the markets or because we are not able to pay you.
