Pareto Nordic Corporate Bond delivered a return well below the underlying portfolio carry in September, impacted by duration, as interest rates increased significantly during the month. US 2-year rates rose by approximately 50 basis points, and even for a portfolio with naturally short interest rate duration, a move of this magnitude will affect performance. Credit spreads widened in European and US markets, while the Nordic high-yield market was broadly flat month over month.

The primary market remained active in September, with a total volume of NOK 25.6 billion priced across 28 transactions, including 6 debut issuers.

The fund participated in three high-yield primaries during the month: HK Foods (consumer), Bonheur (energy) and Troy Companies International (consumer). The latter, a new issuer in the fund, specialises in the development and sourcing of non-food consumer goods for discount and mass-market retailers in Europe.

Three issuers exited the portfolio during the month: Axactor (financial), Euronav/CMB.TECH (shipping) and Íslandsbanki (financial).
