The fund has sustainable investment objectives within the meaning of SFDR article 9. These objectives are:

- Finance solutions that enhance child prosperity
- Promote a safe and clean environment for children
- Contribute to the transition to an economy where all children can enjoy a prosperous life.

Capital at risk. The value of an investment and the income from it can fall as well as rise and you may not get back the amount originally invested.

**Triodos Future Generations Fund invests in shares of listed companies that support an ecosystem of equal opportunity, health and well-being, education and safety for children.**

We select companies that, through their products, services or processes, materially contribute to the welfare of children across the world by addressing at least one of the following areas: child health and survival, access to education, protection from violence and exploitation, environment and climate, and equality and inclusion. Additionally, the companies we invest in must comply with the Triodos minimum standards.

***Principal Adverse Impact Indicators (PAIs)***
GHG intensity of investee companies: The GHG intensity is a relative measure of greenhouse gas (GHG) emissions. It is the amount of GHG produced per unit of revenue generated by the company, measured in tonnes of CO2 per EURm generated in revenue. The carbon intensity is then weighted using the portfolio weight to get a weighted average for the portfolio.
Non-recycled waste ratio: For each company the non-recycled waste ratio is the total amount in metric tons of non-recycled waste produced dividend by the amount invested in EURm. This is expressed as a weighted average.
Excessive CEO pay ratio: This metric measures the ratio within investee companies of the annual total compensation for the highest compensated individual to the median annual total compensation for all employees.

***Risks***
The risk indicator assumes you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less. The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. The product may be exposed to risks, such as concentration risk, currency risk and small- and mid-cap equity risk. This product does not include any protection from future market performance so you could lose some or all of your investment.

When investing in the fund, please take into account all the characteristics and/or objectives of the promoted fund as described in its prospectus. Further, please take notice of the sustainability aspects of the fund as found **here**.
