Flossbach von Storch - Dividend - IT

CATEGORY: EQUITIES
Data as per 30 September 2026

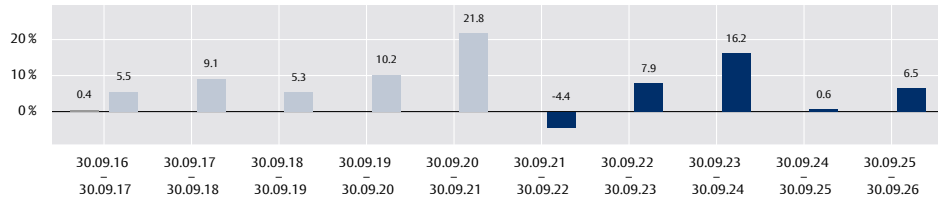

INVESTMENT STRATEGY

Flossbach von Storch - Dividend is a globally diversified equity fund with an active investment approach. The focus is on first-class companies with an attractive dividend profile. What is important here is not only the dividend yield, but above all dividend security and dividend growth potential. When selecting individual securities, the fund management relies on in-house valuation models as well as ESG questions, engagement, and voting. In addition, exclusion criteria defined within the framework of the Sub-Fund's investment policy are taken into account. At least 80 per cent of the Fund's assets are invested directly in equities. In addition, the Fund may invest in share certificates and share index certificates as well as bonds, time deposits and target funds.

The Sub-Fund is actively managed and not benchmarked against an index. The portfolio is composed by the fund manager exclusively in accordance with the criteria defined in the investment policy, reviewed regularly and adjusted if necessary. The sub-fund complies with the standards for credit quality and credit limits in the insurance industry. The sub-fund is categorized as an Article 8 product within the meaning of the Disclosure Regulation (EU) 2019/2088 (SFDR).

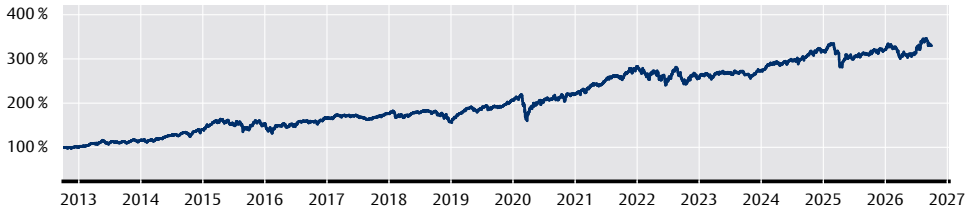

For detailed information on the objectives and investment policy, please refer to the most recent sales prospectus and the Key Information Document (PRIIP-KID).

EXPLANATORY NOTES REGARDING PERFORMANCE

Gross fund performance (BVI method) takes into account all costs incurred at fund level (for example, management fees), net fund performance also takes into account the subscription fee. Further costs may be charged individually at customer level (e.g. custody fees, commissions and other charges). Example calculation (net method): An investor wishes to buy shares with capital of €1,000. Based on a maximum subscription fee of 5 %, € 50 will be deducted from their investment as a one-off initial charge. In addition, custody fees may also be applied, which will further reduce the investor's return. The level of custody fees can be found in your bank's schedule of fees and services. **Please refer to the cost details presented in this document to determine the maximum subscription fee for the share class of the sub-fund.** The reference index is merely informative. It does not constitute any obligation from the fund manager to track the index or achieve the same performance. **Past performance is not a reliable indicator of future performance.**

MONTHLY COMMENTARY

In September, the bond market moved into the spotlight as the rise in yields gathered momentum. Renewed escalation in the Iran conflict pushed Brent crude up around 14% to over USD 100 per barrel, adding to inflationary pressures. Both the European Central Bank and the US Federal Reserve raised their policy rates, while the yield on 10-year US Treasuries – a key global market barometer – climbed to just under 5.3% at month-end, its highest level since 2007. Despite the negative implications of higher rates for equity valuations, the MSCI World gained 1% in euro terms, primarily due to the euro's 2.5% depreciation against the US dollar. Performance varied considerably across sectors: most declined, while information technology and communication services gained significantly, supported by renewed enthusiasm for artificial intelligence. Excitement surrounding the launch of Meta's AI agent app "Muse" fuelled investor optimism. Neither emerging security concerns following incidents involving autonomous AI agents carrying out extensive cyberattacks nor the sharp rise in interest rates materially dampened sentiment. Investors appear notably less concerned about the impact of higher financing costs and discount rates on AI beneficiaries than on companies in most other sectors.

The unit price of the Flossbach von Storch – Dividend underperformed in this environment. On the one hand, a large proportion of technology shares are not included in the Fund due to a lack of compatibility with the Fund's investment strategy. On the other hand, defensive equities were particularly hard hit across the board in the wake of the sharp rise in interest rates.

The largest positive contributions came from Meta, Procter & Gamble (P&G) and Siemens. Meta benefited from enthusiasm surrounding Muse, its mass-market AI agent, while Siemens, which was added to the Fund during the month, benefited from the AI rally given its role in the data-centre construction value chain. P&G's share price was supported by the stronger US dollar.

GLOSSARY

[1] Current dividend yield of portfolio companies weighted by portfolio share.

[2] Portion of dividend distribution from free cash flow weighted by portfolio share.

[3] Rate of increase p.a. of the last announced dividend vs. the dividend five years ago, weighted by portfolio share.

Flossbach von Storch - Dividend - IT

MONTHLY COMMENTARY - CONTINUED

The largest negative contributions to value were indicative of the key drivers of weakness last month: the digital travel platform Booking was hit particularly hard by high interest rates and the ongoing war in the Middle East. US tax and business software provider Intuit saw significant share price losses again following a very strong rise in the previous month, driven by AI concerns. Meanwhile, the luxury goods conglomerate LVMH was hit by a combination of high interest rates, the war and economic concerns from China, which together are fuelling fears that the business recovery is not progressing as expected.

OPPORTUNITIES

+ These funds aim to exploit growth opportunities on global equity markets.
+ Investing in assets denominated in a foreign currency can have a positive impact on unit values as a result of exchange rate movements.
+ Derivatives can be used to increase potential yields.
+ Potential to achieve above-average dividend income.

RISKS

- Equity markets and thus also unit values can experience severe fluctuations in response to market developments. The result can be a fall in the trading price. ESG criteria can restrict the selection of target investments in terms of category and number, sometimes considerably.
- Investing in assets denominated in a foreign currency can have a negative impact on unit values as a result of exchange rate movements.
- Where used, derivatives can have a greater negative impact on the fund value than would be the case if the assets were acquired directly. This can affect the fund's risk profile and volatility (tendency for the price to fluctuate).
- If dividends are reduced or not paid out at all, this can have a negative impact on investment returns.
- By hedging currency risks, the fund share value may be adversely affected.

Please read the Prospectus and particularly the RISK WARNINGS section and the specific annex of the subfund to understand the risks and benefits of this product.

INVESTOR PROFILE

GROWTH-ORIENTED:

The fund is appropriate for growth-oriented investors. Due to the composition of the net subfund assets, there is a high degree of risk but also a high degree of profit potential. The risks may consist in particular of currency risk, credit risk and price risk, as well as market interest rate risks.

INVESTMENT HORIZON:

Medium- to long-term: over 5 years

RISK INDICATOR

Lower risk ← → Higher risk

1	2	**3**	4	5	6	7

The risk indicator assumes you keep the product for a minimum of 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less. The summary risk indicator ("SRI") is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. Unusual market conditions could arise, for example, due to currency, creditworthiness, price, counterparty, liquidity and interest rate risks, as detailed in the sales prospectus. We have classified this product as 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact the Fund's capacity to pay you. This product does not include any protection from future market performance. Please refer to the 'Risk' section of the sales prospectus for more details.
