Objective

The Funds objective is to preserve capital and provide liquidity whilst aiming to provide a return in line with prevailing short term money market rates for which SONIA has been chosen as a benchmark.

Portfolio securities

- The Fund invests in high quality Sterling denominated money market instruments.
- Minimum liquidity maturity requirements are 10% overnight and 30% maturing in one week.
- The Fund invests in securities with an outstanding term to maturity of no more than 397 days. The entire Fund must have a weighted average maturity of no more than 60 days and a weighted average life (WAL) of no more than 120 days.
- The Fund may have exposure to assets which have zero or negative yields in adverse market conditions.
- Investments will follow the "abrdn Liquidity Sterling Fund Investment Approach" (the "Investment Approach").
- This approach utilises Aberdeen Investments' fixed income investment process, which enables portfolio managers to qualitatively assess how ESG factors are likely to impact on the company's ability to repay its debt, both now and in the future. To complement this research, MSCI ESG Scoring is used to quantitatively identify and exclude those companies exposed to the highest ESG risks. In addition, a set of company exclusions are applied, which are related to the UN Global Compact, Controversial Weapons, Tobacco Manufacturing and Thermal Coal.
- Further detail of this overall process is captured within the Investment Approach, which is published at www.aberdeeninvestments.com under "Fund Centre".

Key risks

a. The value of investments and the income from them can fall and investors may get back less than the amount invested.
b. The fund price is not guaranteed, and the risk of loss is borne by the investor. An event such as default by a bank with which the fund has deposited money would cause the fund price to fall. A fall may also occur if interest rates fall so low as to be less than the charges applied to the fund. An investment in the fund is different from an investment in bank deposits because the value of the investment may fluctuate. Money market instruments that produce a higher level of income usually also carry greater risk as issuers may not be able to pay the income or capital as promised. Although the fund is a Short-Term Low Volatility Net Asset Value Money Market Fund (LVNAV) where subscriptions and redemptions of income shares are normally carried out at a price equal to the Constant NAV, this is not guaranteed. Where circumstances arise that no longer permit the fund to maintain a Constant NAV, subscriptions and redemptions of income shares will instead be carried out at a Variable NAV. Similarly, should interest and deposit rates become low or negative, income shares may be converted into accumulation shares, where all subscriptions and redemptions are carried out at a Variable NAV. The fund does not rely on external support for guaranteeing liquidity or stabilising the NAV per share.
c. Applying ESG and sustainability criteria in the investment process may result in the exclusion of securities within the fund's benchmark or universe of potential investments. The interpretation of ESG and sustainability criteria is subjective meaning that the fund may invest in companies which similar funds do not (and thus perform differently) and which do not align with the personal views of any individual investor.

A summary of investor rights can be found in English on our website - https://www.aberdeenplc.com/legal.To help you understand this fund and for a full explanation of risks and the overall risk profile of this fund and the shareclasses within it, please refer to the Key Investor Information Documents and Prospectus which are available on our website www.aberdeeninvestments.com. The Prospectus also contains a glossary of key terms used in this document. Each of the Investment Managers receives fees for the provision of investment services to abrdn Liquidity Fund (Lux). The fees are calculated as a percentage of the Net Asset Value of each Class and will not exceed the levels set out in Appendix G of the Prospectus. The Investment Manager may, at its absolute discretion from time to time (which in certain circumstances may be daily) decide to vary such rate between the maximum level set out in Appendix G of the Prospectus and 0%.
This Fund concerns the acquisition of units or shares in a fund, and not in a given underlying asset such as a building or shares of a company.
[2] The other operating charges figure (OOC) is the total expenses paid by each share class, against its average net asset value. This includes the annual management charge, the other operating expenses and any synthetic element to incorporate the ongoing charges of any underlying qualifying investments. The OOC can fluctuate as underlying costs change. Where underlying costs have changed, the OOC disclosed in the Fund offering Documents will be updated to reflect current changes.
