Key Information Document

Purpose

This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

Product

28/04/2026

Allroad Equity Class AI ISIN: LU1692844589

A sub-fund of QUALION FINANCE INVESTMENT SICAV • Product manufacturer: CA Indosuez Fund Solutions S.A., a subsidiary of CA Indosuez Wealth (Europe) • www.ca-indosuez-fundsolutions.com • caifs@ca-indosuez.lu • +352 2664501 • Competent authority : Commission de Surveillance du Secteur Financier

What is this product?

Product type Accumulation shares (shares in which any income and capital growth are retained in the share price) of a sub-fund of a SICAV, a regulated open-ended fund with segregated liability between its sub-funds.

Investment objective and policy

Objective(s) To increase the value of your investment over the long term.

Benchmark(s) The sub-fund is not managed in reference to an index.

Investment policy Under normal conditions, the sub-fund mainly invests in shares of companies anywhere in the world, including emerging markets (except in China, Russia and India).

The sub-fund may use derivatives for reducing risks (hedging) and costs, and to seek investment gains.

Strategy In actively managing the sub-fund, the investment manager uses macroeconomic and market analysis to identify companies that appear to have above-average growth prospects.

ESG approach The investment manager may, or may not, consider environmental, social and governance (ESG) factors when assessing investment risks and opportunities, and may be exposed to securities or issuers that have a low ESG profile.

SFDR category Article 6.

Base currency EUR

Planning your investment

Product availability The sub-fund is available to professional investors and retail investors with basic financial knowledge.

Investor profile The sub-fund may appeal to investors who understand the risks of the sub-fund and:

- are looking for a growth-oriented investment
- are interested to gain exposure to global equity markets, either for a core investment or for diversification purposes
- have a high risk profile and can tolerate significant losses

Processing requests Requests to buy, sell (redeem) and exchange (when allowed) shares of the sub-fund are processed every Luxembourg business day.

Terms to understand

derivatives Financial instruments whose value is linked to one or more rates, indexes, share prices or other values.

SFDR article 6 Under the EU directive on sustainable finance disclosure, a financial product that does not promote environmental or social characteristics, or have a sustainable investment objective.

emerging markets Markets of less economically developed nations, such as some nations in Asia, Africa, Eastern Europe and Latin America.

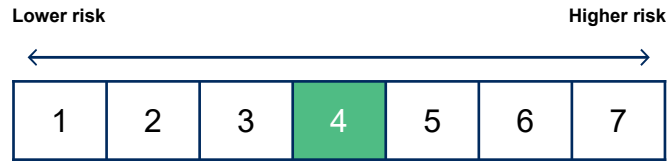

shares Securities that represent a share in the business results of a company.

Depositary: CACEIS Bank, Luxembourg Branch

For more information, including the prospectus and financial reports, see "Other relevant information" on page 3.

What are the risks and what could I get in return?

Risk indicator

The risk indicator assumes you keep this product for **at least 5 years**. Selling before the end of this period significantly increases the risk of lower investment returns or a loss.

The risk indicator is designed to help you compare the risks of investment products. It uses the required calculation methodology, which includes market movements and the risk that the product manufacturer cannot pay out as required. The risk indicator is not guaranteed and may change over time.

All investments involve risk. The value of your investment in this product can go up and down, and you could lose some or all of your investment. This product is rated at the medium risk level (4 out of 7). Poor market conditions are very likely to reduce the value of your investment.

The sub-fund's risk level reflects the following:

• As an asset class, shares carry higher risks than bonds or money market investments.

Other important risks partly or completely unreflected in the risk indicator:

• **If your currency as an investor is different from the subscription currency of this product, changes in currency exchange rates could reduce any investment gains or increase any investment losses.**

• Unusual market conditions or large unpredictable events can amplify this product's risks and trigger other risks such as counterparty, liquidity and operational risks (a complete description of risks can be found in the prospectus - see Other relevant information below).

• If you place a request to sell (redeem) shares at a time when this product has received many other sell requests, the processing of your order may be delayed, which could affect the price you receive for your shares.

Performance Scenarios

This table shows the money you could get back (net of costs) over different periods, under different scenarios, assuming you were to invest EUR 10,000 in the sub-fund. You can compare this with the scenarios of other products.

The figures shown include all costs of the product itself. The figures do not take into account your personal tax situation, which may affect how much you get back.

What you will get from this product depends on future market performance.
Note that future market developments are uncertain and cannot be accurately predicted.

Recommended holding period:		**5 years**	
Example Investment:		**10,000 EUR**	
		If you exit after 1 year	**If you exit after 5 years**
Scenarios			
Minimum			
Stress	**What you might get back after costs**	4,420 EUR	3,620 EUR
	Average return each year	-55.83%	-18.37%
Unfavourable	**What you might get back after costs**	8,140 EUR	10,130 EUR
	Average return each year	-18.60%	0.27%
Moderate	**What you might get back after costs**	10,170 EUR	13,600 EUR
	Average return each year	1.73%	6.34%
Favourable	**What you might get back after costs**	13,110 EUR	17,190 EUR
	Average return each year	31.11%	11.44%

The unfavourable, moderate and favourable scenarios shown are illustrations using the worst, average and best performance of the product over the last 10 years. The stress scenario shows what you might get back in extreme market circumstances. Markets could develop very differently in the future.

Unfavourable scenario: this type of scenario occurred for an investment between 31/12/2024 and 31/12/2025.

Moderate scenario: this type of scenario occurred for an investment between 29/11/2019 and 29/11/2024.

Favourable scenario: this type of scenario occurred for an investment between 30/10/2020 and 31/10/2025.

What happens if CA Indosuez Fund Solutions S.A. is unable to pay out?

The sub-fund's assets are segregated from those of the other sub-funds in the SICAV and from CA Indosuez Fund Solutions S.A., the product manufacturer and management company of the sub-fund. Even if it were to fail, the product manufacturer could not use the sub-fund's assets to pay its debts.

The only scenario under which an investor could incur a loss is by selling shares at a time when they are worth less that what the investor paid.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

This table shows the amounts taken from your investment to cover different costs. These amounts depend on how much you invest, how long you hold your investment, and how the sub-fund performs. The amounts shown are illustrations based on a hypothetical investment amount and different investment periods.

We have assumed that:

• in the first year, you would get back the amount that you invested (0% annual return);

• for the other holding period(s), the sub-fund performs as shown above in the “moderate” scenario
• EUR 10,000 is invested.

	If you exit after 1 year	If you exit after 5 years
Total costs	715 EUR	1,349 EUR
Annual cost impact (*)	7.1%	2.6% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period, your average return per year is projected to be 8,9 % before costs and 6,3 % after costs.

Composition of the costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	3,0% of the amount you pay in when entering this investment. This is the most you will pay, you could pay less.	Up to 300 EUR
Exit costs	3,0% The costs of exiting your investment (redemption fee). This is the most you will pay, you could pay less.	288 EUR
Ongoing costs taken each year		
Management fees and other administrative or operating costs	1,1% of the value of your investment per year. This is an estimate based on actual costs over the last year.	104 EUR
Transaction costs	0,1% This is an estimate of the costs incurred when buying and selling investments underlying the sub-fund. The actual amount will vary depending on the quantity bought and sold.	7 EUR
Incidental costs taken under specific conditions		
Performance fees	There is no performance fee for this product.	0 EUR

How long should I hold it and can I take money out early?

Recommended holding period At least 5 years.

Redeeming your investment You can request to take out some or all of your money at any time. See Processing requests in *What is this product?* above.

How can I complain?

You can send an email including a description of the issue and your contact details to Caifs_compliance@ca-indosuez.lu, or send your complaint in writing together with supporting documents, to:

CA Indosuez Fund Solutions S.A.
To the attention of the Chief Compliance Officer
12, rue Eugène Ruppert
L-2453 Luxembourg.
