Please call +33 1 45 08 79 70 for further information.

The Autorité des Marchés Financiers (AMF) is responsible for the supervision of Swiss Life Asset Managers France with regard to this key information document. Swiss Life Asset Managers France is approved in France under no. GP-07000055 and regulated by the AMF.

Date of production of the key information document: 12 June 2026.

What is this product?

Type: Undertaking for collective investment in transferable securities (UCITS) taking the form of a Fonds Commun de Placement (French Common Fund – FCP)

Classification: International bonds and other debt securities

Term: The maturity date for this product is 30 June 2032.

Swiss Life Asset Managers France is entitled to terminate the product unilaterally. The Management Company reserves the right to make any change or transfer likely to lead to the merger, split or liquidation of your product.

Objectives

Swiss Life Funds (F) Opportunité High Yield 2032 is a fund primarily invested in speculative (high yield) bonds with effective maturities close to 30 June 2032. The Fund's investment objective is to seek, at the time of subscription and throughout the investment period from the Fund's inception until 30 June 2032, a net return linked to the performance of the securities held in the portfolio under discretionary management. The objective is determined in accordance with market conditions, which may change throughout the Fund's lifetime. Securities maturing before the investment horizon may be reinvested in accordance with prevailing market terms.

The product is managed actively and on a discretionary basis. The Fund is not managed with reference to an index.

The strategy is not limited to bond carry: the Management Company may switch investments in order to take advantage of market opportunities or if there is an increase in the default risk of an issuer in the portfolio. The issuers of the securities are private companies operating in OECD countries. Securities will be denominated in EUR, USD, GBP, NOK, SEK, DKK, AUD, CHF and CAD. Credit quality is mostly high yield (rated below BBB by Standard & Poor's, Fitch, Moody's or equivalent according to the management company's analysis) but may also be investment grade, depending on what buying opportunities arise. If a security is downgraded, then its sale will be at the fund manager's discretion. Securities not denominated in euro will be hedged against currency risk, as the Fund does not seek to expose itself to this risk. Given the volatility of the markets, up to 2% of the portfolio may be exposed to residual currency risk.

The Fund is exposed to at least 10 different business sectors (potential sectors include: automotive, heavy industry, capital goods, retailers, consumer goods, healthcare, media, real estate, services, technology and electronics, telecommunications, water and electricity, financial services, transport, leisure, etc.). Modified duration range: between 0 and 10. With the Fund being set to mature on 30 June 2032, it may be managed as a money market fund from 1 April 2032 onwards in order to facilitate its end-of-life phase. Following AMF approval, the management company may, for example, opt for a new investment strategy, a new investment period, dissolution, or a merger with another fund.

Derivatives: Derivatives: The Fund may use derivatives to systematically hedge the portfolio against currency risk, up to a maximum of 110% of assets, with leverage.

Securities with embedded derivatives: authorised up to a maximum of 100% of the Fund's assets.

You can request the redemption of your units on any business day.

Dividends are not intended for distribution. Any income arising from the product is reinvested.

Intended retail investor: All investors, in particular those seeking a return on a 30 June 2032 horizon and subscribing via distributors or intermediaries subject to national laws prohibiting all retrocessions to distributors or providing an independent advisory service within the meaning of the European MiFID II regulation or providing an individual discretionary portfolio management service. Investors must not be US Persons as defined in the prospectus. To determine how much it is reasonable to invest, investors must consider their personal situation, but also their willingness to take risks or preference for a cautious investment. Investors understand and accept the risk of capital loss associated with changes in market conditions.

Product depositary: SwissLife Banque Privée

Additional information on the product

Further information on the product, a copy of the prospectus, the latest annual report, any subsequent semi-annual reports and the latest net asset values of the units can be obtained free of charge in French and English at https://fr.swisslife-am.com or at the registered office of Swiss Life Asset Managers France.

What are the risks and what could I get in return?

Risk Indicator

1 **2** 3 4 5 6 7

Lowest risk — Highest risk

The risk indicator assumes you keep the product until 30 June 2032.
The actual risk may be very different if you choose to exit before maturity, and you may obtain less in return.
You risk not being able to sell your product easily or having to sell it at a price that significantly impacts the amount you receive in return.

The summary risk indicator is a guide to the level of risk of this product compared with others. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 2 out of 7, which is a low risk class. This rates the potential losses from future performance at a low level, and poor market conditions are very unlikely to impact our capacity to pay you.

Other significant risks for the product not included in the summary risk indicator: liquidity risk, risks associated with derivatives and securities financing transactions, counterparty risk (a detailed list of risks can be found in the prospectus).

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. These figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get back from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the best and worst performances, as well as the average performance of the product combined with that of the appropriate proxy over the last 11 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Recommended holding period: 6.0 years Investment example: EUR 10,000		**If you exit after 1 year**	**If you exit after 6.0 years**
Scenarios			
Minimum		There is no minimum guaranteed return. You could lose all or part of your investment.	
Stress	**What you might get back after costs**	**7,900 EUR**	**7,250 EUR**
	Average return each year	-21.0%	-5.1%
Unfavourable	**What you might get back after costs**	**8,160 EUR**	**9,560 EUR(*)**
	Average return each year	-18.4%	-0.7%
Moderate	**What you might get back after costs**	**10,180 EUR**	**10,810 EUR(*)**
	Average return each year	1.8%	1.3%
Favourable	**What you might get back after costs**	**11,820 EUR**	**12,210 EUR(*)**
	Average return each year	18.2%	3.3%

(*) The unfavourable scenario occurred for an investment (compared with the proxy index: 50% ICE BofA Euro Non-Financial High Yield Constrained Index + 50% ICE BofA US Non-Financial High Yield Constrained Index (EUR-hedged)) between August 2017 and October 2023. The moderate scenario occurred for an investment (compared with the proxy index: 50% ICE BofA Euro Non-Financial High Yield Constrained Index + 50% ICE BofA US Non-Financial High Yield Constrained Index (EUR-hedged)) between July 2018 and September 2024. The favourable scenario occurred for an investment (compared with the proxy index: 50% ICE BofA Euro Non-Financial High Yield Constrained Index + 50% ICE BofA US Non-Financial High Yield Constrained Index (EUR-hedged)) between September 2015 and November 2021.

It is hard to exit this product.

What happens if Swiss Life Asset Managers France is unable to pay out?

The product is a mutual fund of financial instruments and deposits. It is separate from Swiss Life Asset Managers France. If Swiss Life Asset Managers France declares bankruptcy, the product assets held by the depositary will not be affected. If the depositary declares bankruptcy, the product's risk of financial loss will be mitigated by the legal separation that exists between the assets of the depositary and those of the product.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on the amount you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods. Here is our assumption:

- In the first year, you would get back the amount you invested (0% annual return). For the other holding periods, we assume that the product achieves the performance indicated in the moderate scenario.
- EUR 10,000 are invested.

	If you exit after 1 year	If you exit after 6.0 years
Total costs	308 EUR	893 EUR
Annual cost impact (*)	3.1%	1.4% per year

(*) It shows the extent to which costs reduce your annual return over the holding period. For example, it shows that if you exit at the end of the recommended holding period, your average return per annum is expected to be 2.7% before costs and 1.3% after this deduction.

We may share some of the costs with the person selling the product to you to cover the services they provide to you. The person will inform you of this amount.

These figures include the maximum distribution fee that the person selling you the product may charge (2.0% of the amount invested / EUR 200). This person will inform you of the actual distribution fee.

Composition of costs

One-off costs on entry or exit		If you exit after 1 year
Entry costs	2.0% of the amount you pay on entry to this investment. This includes distribution costs of 2.0% of the amount invested / EUR 200. This is the most you will be charged. The person selling you the product will inform you of the actual amount.	Up to EUR 200
Exit costs	We do not charge exit costs for this product, but the person selling the product to you may do so.	N/A
Ongoing costs taken each year		
Management fees and other administrative or operating costs	0.7% of the value of your investment per year. This estimate is based on actual costs over the last year.	69 EUR
Transaction costs	0.4% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the investments underlying the product. The actual amount will vary depending on the amounts we buy and sell.	39 EUR
Incidental costs taken under specific conditions		
Performance related fees	There is no performance fee for this product.	N/A

How long should I hold it and can I take money out early?

Minimum recommended holding period: 6.0 years

This term is the period during which you are advised to remain invested in order to obtain a potential return while minimising the risk of losses. This period is linked to the asset class of your product, its investment objective and its investment strategy.

You may get back less than expected if you exit before the end of the recommended holding period. The recommended holding period is an estimate and should not be taken as a guarantee or indication of future performance, return or risk levels.

You can request the redemption of some or all of your shares from SwissLife Banque Privée. Your redemption request will be made on the basis of the last net asset value established after the deadline for centralising redemptions (i.e. at an unknown price). It must be received no later than 11.00 a.m. (Paris time) on the date the net asset value is calculated, it being specified that the settlement period for unit redemptions (i.e. the period between the deadline for centralisation of redemptions and the settlement date of redemptions) is two days.

Please refer to the cost composition table for more information.

The Fund has a redemption gate mechanism and may use swing pricing to protect unitholders from the costs of portfolio restructuring in the event of large net subscriptions or redemptions. The way in which these mechanisms work is described in the Fund prospectus and regulations.

How can I complain?

Should you wish to complain, please contact the FCP's distributor or the Client Services department of the management company by calling +33 1 45 08 79 70, emailing reclamation@swisslife-am.com, or writing to Swiss Life Asset Managers France, Service Client - Réclamation, Tour la Marseillaise, 2 bis, boulevard Euroméditerranée, Quai d'Arenc - CS 50575, 13236 Marseille Cedex 02. The complaints procedure is available on the management company's website: https://fr.swisslife-am.com/en/home/regulatory-information.html.

Other relevant information

The legal documents as well as the ESG report are available free of charge on request from the management company and on the website: https://fr.swisslife-am.com/en/home.html. The Fund promotes ESG criteria within the meaning of Article 8 of Regulation (EU) 2019/2088 of 27/11/2019. The positive contribution of environmental, social and governance (ESG) criteria may be taken into account in investment decisions, without being a determining factor.

Information on the past performance of the product is available at https://invest.swisslife-am.com/documents/Past_Performance/FR/HST_PERF_FR0014011SC9_fr.pdf. The data on past performance is presented for 0 years.

Previous monthly performance scenario calculations for the product are available at https://invest.swisslife-am.com/documents/Scenario_Performance/FR/SNR_PERF_FR0014011SC9_fr.pdf.

For more information, please refer to our website; there you will find all the legal documentation. This document will be updated at least once every 12 months.

If, following your various exchanges, you feel that the response provided is not satisfactory, you can contact the AMF Ombudsman free of charge: 1. By mail addressed to: AMF Ombudsman, Autorité des marchés financiers - 17, place de la Bourse 75082 Paris Cedex 2 or; 2. Using the electronic form accessible on the AMF website: http://www.amf-france.org.

When this product is used for a unit-linked life insurance policy or capital bond, additional information on this policy, such as the costs of the policy, which are not included in the costs set out in this document, the complaints procedure and what happens if the insurance company declares bankruptcy is presented in the key information document for the relevant policy. This document must be provided by your insurer or broker, or by any other insurance intermediary, in accordance with their legal obligations.
