Objective and Investment Policy

The Sub-Fund seeks to offer investors capital growth through diversification of its investments over all categories of assets and a policy of following a 'value' approach.
To pursue its goal, it invests at least two-thirds of its Net Assets in equities, Equity-linked Instruments and bonds without any restriction in terms of market capitalisation, geographical diversification or in terms of what part of the assets of the Sub-Fund may be invested in a particular class of assets or a particular market. The investment process is based on fundamental analysis of the financial and business situation of the issuers, market outlook and other elements.

UK retail investors will not have any protection under the UK Financial Services Compensation Scheme (FSCS).

Lower Risk — Higher Risk

⚠ The SRI represents the risk and return profile as presented in the Key Information Document (KID). The lowest category does not imply that there is no risk. The SRI is not guaranteed and may change over time. The risk indicator assumes you keep the product for 5 years.
The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movement in the markets or because we are not able to pay you.

Management commentary

September Highlights

- The First Eagle Amundi International Fund returned -5.13% in September (USD, AUC share class).
- No equity sector contributed positive returns.
- Financials, Consumer Staples, and Consumer Discretionary were the largest detractors.
- Gold-related securities also detracted from returns.

Month-End Market Review

Financial markets declined in the month of September as higher bond yields, persistent energy-driven inflation and the ongoing conflict in Iran weighed on sentiment in the face of continued strength in artificial intelligence (AI)-related technology stocks. The S&P 500 Index fell 0.3% while the MSCI World Index decreased 1.2% and the MSCI EAFE Index was down 3.1%. By style factor, large cap growth stocks outperformed large cap value in the US, where performance was driven by semiconductor and mega-cap technology stocks. In non-US markets, value outperformed growth and in the US, small caps also underperformed large caps. The Federal Reserve increased its benchmark rate for the first time in three years as Treasury yields rose sharply and the 10-year yield reached 5.30%. The Bloomberg Global Aggregate Index declined 2.4% and the Bloomberg US Aggregate Bond Index fell 2.6%. The US Dollar Index was up 2.0% and gold bullion decreased 6.3%.
