The Investment Manager

DUNN CAPITAL MANAGEMENT, LLC

Investment Objective & Strategy

DUNN WMA Institutional UCITS Fund is a 100% systematic medium to long-term trend following program, encompassing a portfolio of financial, energy, metal and agricultural futures markets. The investment objective is to extract profits from up & down-trends, resulting in a return stream that exhibits very low correlation with traditional asset classes. The DUNN WMA Institutional UCITS Fund targets half the volatility of DUNN's flagship WMA Program and volatility is expected to average circa 11.5% annually over time. Past performance does not predict future returns.

DUNN WMA Institutional Program Performance

The above performance pertains to the performance since inception of the DUNN World Monetary and Agriculture (WMA) Institutional Program, which is not a UCITS regulated Fund.

UCITS Fund tracks DUNN WMA Institutional Program
UCITS Fund tracks DUNN WMA Program

Following a restructuring and rebranding on the 26th September 2014, the UCITS Fund now tracks the WMA Institutional Program, which targets half the volatility of the flagship WMA Program. Prior to 26th September 2014 the UCITS Fund tracked the WMA Program. Returns between the inception of the fund on 1st September 2011 and 31st December 2012 relate to the USD Institutional Class C. Returns from 1st January 2013 to date relate to the USD Institutional Class. Performance information should be read in conjunction with the Key Risks set out in the Investment Glossary.

Disclaimer

RISK WARNING: This is a marketing communication. Past performance is not a reliable indicator of future results, prices of investments and the returns from them may fall as well as rise. You should ensure you understand the risk profile of the products or services you plan to purchase. Financial products may use high leverage and financial derivative instruments as part of the investment process and may therefore only be suitable for the more experienced investor. Leveraging magnifies both potential gains and potential losses; an adverse market move can lead to a loss greater than the initial investment. The return or value of an investments may increase or decrease as a result of currency fluctuations. Changes in exchange rates may have an adverse effect on the value price or income of the product. Short-selling can generate significant losses in rapidly rising markets. There is liquidity risk where certain securities may be difficult to buy or sell quickly without affecting prices. The DUNN WMA Institutional UCITS Fund (the "Fund") may use higher leverage and financial derivative instruments as part of the investment process. The fund is actively managed and not managed in reference to any benchmark index. A typical investor will be sophisticated and experienced in analysing complicated investment strategies and that the typical investor has a long time frame for this investment and a high tolerance for risk. The Fund does not pursue an environmental, social or sustainability objective and is classified as Article 6 under the Sustainable Finance Disclosure Regulation ("SFDR"). Information relating to the Sustainable Finance Disclosure Regulation ("SFDR") fund disclosures can be found on the Waystone website (https://www.waystone.com/our-funds/waystone-managed-funds/). Sustainability risks may have a material negative impact on the value of an investment and may result in an entire loss of value of the relevant investment(s). Information relating to the SFDR fund disclosures can be found on the Waystone website (https://www.waystone.com/our-funds/waystone-managed-funds/). The decision to invest in the Fund should take into account all of the Fund's characteristics and objectives as described in its prospectus and other relevant fund documentation.

The Manager of the Fund is Waystone Management Company (IE) Ltd, a company regulated by the Central Bank of Ireland. The Investment Manager for the Fund, DUNN Capital Management LLC ("DUNN") is authorised and regulated by the US Commodity Futures Trading Commission. The Fund is available on the Montlake UCITS Platform ICAV. The Montlake UCITS Platform ICAV is registered and regulated as an open-ended Irish collective asset-management vehicle with segregated liability between sub-funds formed in Ireland under the Irish Collective Asset management Vehicles Act 2015 and authorised by the Central Bank as a UCITS pursuant to the UCITS Regulations. The Manager of the Fund has appointed Waystone Investment Management (IE) Limited ("WIM"), regulated by the Central Bank of Ireland, as distributor in the EU and Waystone Financial Investments Limited ("WFI"), authorised and regulated by the Financial Conduct Authority, as distributor in the UK. For the avoidance of doubt, WIM does not distribute funds in the UK and WFI does not distribute funds in the EU. The Fund is authorised and regulated by the Central Bank of Ireland. The Representative in Switzerland is Waystone Fund Services (Switzerland) SA ("WFS"), Avenue Villamont 17, 1005 Lausanne, Switzerland, whilst the Paying Agent is NPB Neue Privat Bank AG, Limmatquai1/am Bellevue, P.O. Box, CH-8024 Zurich. In respect of the shares offered in Switzerland, the place of performance is at the registered office of the Representative. The place of jurisdiction is at the registered office of the Representative or at the registered office or place of residence of the investor. Copies of the Instrument of Incorporation, the Prospectus, the Key Information Documents, as well as the annual and semi-annual reports of the ICAV, may be obtained free of charge from the Representative. WMC, WIM, WFS and WFI are collectively referred to as "Waystone".

The distribution of this report does not constitute an offer or solicitation, and this notice shall not be construed as an offer of sale in any other fund managed or advised by DUNN Capital Management LLC ("DUNN") or Waystone Management Company (IE) Ltd ("Waystone"). Any investment in the Fund should be based on the full details contained in the Fund's Supplement Prospectus, PRIIP "key information document" (KID) or UCITS "key investor information document" (KIID) which together with the Montlake UCITS Platform ICAV Prospectus may be downloaded, in English, from the Waystone website (https://www.waystone.com/our-funds/waystone-managed-funds/). Where relevant, the KID/KIID and prospectus is available in an official language of the jurisdictions in which the Fund is registered for sale. Please refer to the prospectus and to the PRIIP "key information document" (KID) or UCITS "key investor information document" (KIID) before making any final investment decisions. An investment in the Fund concerns the acquisition of shaFund and not a direct investment in the funds' underlying assets. Information given in this document has been obtained from, or based upon, sources believed by us res in each to be reliable and accurate although neither Waystone nor the DUNN Capital Management LLC accepts liability for the accuracy of the contents. Investment Glossary

Term	Definition
Annualised Return	The average yearly profit an investment generates over a specific period, assuming the returns are compounded each year. It helps investors understand what their annual earnings would look like if the investment's growth rate remained consistent.
Annualised Volatility	Measures how much the value of a portfolio, security, or index fluctuates on average each year. Large, frequent price changes indicate high volatility (and higher risk), while smaller, steadier movements suggest lower volatility. It's a key indicator of investment risk.
Drawdown	A measure of the decline from a portfolio's peak value to its lowest point over a specific period, showing the extent of loss before a new high is reached. It is commonly used to assess risk and the potential for recovery in investments.
Exposure	The portion of a portfolio that is affected by the price changes of a particular asset, sector, market, or economic factor. It's usually shown as a percentage of the total portfolio (e.g., 10% exposure to mining).
Leverage	Calculated by adding up the gross exposure from each sector traded by a program, expressed as a percentage of the fund's capital. It does not include leverage from currency hedging or borrowing.
NAV (Net Asset Value)	Stands for Net Asset Value per share. It's found by subtracting a fund's liabilities from its assets and dividing by the number of shares in circulation.
Net and Gross Exposure	Net exposure is the difference between the portfolio's long and short positions (e.g., 100% long minus 20% short equals 80% net exposure). Gross exposure is the total of all long and short positions combined (e.g., 100% long plus 20% short equals 120% gross exposure).
Performance Contribution	Indicates how much each asset class has contributed to the fund's overall performance.
Management Fee	An ongoing charge paid out of the fund's assets to compensate the investment manager for managing the portfolio.
Performance Fee	Paid to the investment manager if the fund achieves certain performance targets, often above those set in the investment objective. For full details, see the fund's prospectus/supplement.
Sharpe Ratio	Measures how much excess return an investment earns for each unit of risk taken, compared to a risk-free asset. Higher ratios are better: above 1 is good, above 2 is very good, and 3 or more is excellent. Negative ratios are shown as N/A because they can be misleading.
YTD (Year-to-Date)	"Year-to-date," referring to the period from the start of the current year up to today.

Term	Definition
Market Risk	The Fund's value may fluctuate due to typical market movements and exposure to global securities markets.
Derivatives Risk	Prices depend on one or more underlying assets and may be volatile.
Currency Risk	Investments in foreign currencies can rise or fall as exchange rates change.
Leverage Risk	Using derivatives can increase the Fund's leverage, potentially amplifying losses.

A complete description of risks is set out in the Fund's prospectus and supplement.
